

SAFETY DATA SHEET

Conditioner Solution Kit (5 pack)

SDS no.:

02578644

SECTION 1: Identification of the substance/mixture and of the company/undertaking

1.1 Product identifier

Product name : Conditioner Solution Kit (5 pack)
Product code : 02578644, 478701, 00156067H, 10311078

1.2 Relevant identified uses of the substance or mixture and uses advised against

Identified uses Electrode Conditioning Unit Dose Container Diagnostic agents.

Restrictions on use For professional users only.

Supplier : Siemens Healthcare Diagnostics Limited
 Park View,
 Watchmoor Park,
 Camberley,
 Surrey,
 GU15 3YL
 United Kingdom

Phone: +44 (0) 345 600 1955

e-mail address of person responsible for this SDS : dx.msds.healthcare@siemens-healthineers.com

1.4 Emergency telephone number

CHEMTREC: +44 20 3807 3798

SECTION 2: Hazards identification

2.1 Classification of the substance or mixture

Product definition : Electrode Conditioning Unit Dose Container Mixture

Classification according to UK CLP/GHS

Electrode Conditioning Unit Dose Container

Skin Irrit. 2, H315

Eye Irrit. 2, H319

The product is classified as hazardous according to UK CLP Regulation SI 2019/720 as amended.

See Section 16 for the full text of the H statements declared above.

See Section 11 for more detailed information on health effects and symptoms.

2.2 Label elements

Hazard pictograms :

Signal word : Electrode Conditioning Unit Dose Container Warning

Hazard statements : Electrode Conditioning Unit Dose Container H315 - Causes skin irritation.

H319 - Causes serious eye irritation.

Precautionary statements

Conditioner Solution Kit (5 pack)

SECTION 2: Hazards identification

Prevention	: Electrode Conditioning Unit Dose Container	P264 - Wash hands thoroughly after handling. P280 - Wear protective gloves/protective clothing/eye protection/face protection.
Response	: Electrode Conditioning Unit Dose Container	P337 + P313 - If eye irritation persists: Get medical advice/attention.
Storage	: Electrode Conditioning Unit Dose Container	Not applicable.
Disposal	: Electrode Conditioning Unit Dose Container	Not applicable.
Supplemental label elements	: Electrode Conditioning Unit Dose Container	Not applicable.
Annex XVII - Restrictions on the manufacture, placing on the market and use of certain dangerous substances, mixtures and articles	: Electrode Conditioning Unit Dose Container	Not applicable.

2.3 Other hazards

Product meets the criteria for PBT or vPvB according to Regulation (EC) No. 1907/2006, Annex XIII	: Electrode Conditioning Unit Dose Container	This mixture does not contain any substances that are assessed to be a PBT or a vPvB.
Other hazards which do not result in classification	: Electrode Conditioning Unit Dose Container	None known.
Additional information	: Not available. Not available.	

SECTION 3: Composition/information on ingredients

3.1 Substances : Electrode Conditioning Unit Dose Container Mixture

Product/ingredient name	Identifiers	%	Classification	Type
Electrode Conditioning Unit Dose Container ammonium bifluoride	EC: 215-676-4 CAS: 1341-49-7 Index: 009-009-00-4	<1	Acute Tox. 3, H301 Skin Corr. 1B, H314 Eye Dam. 1, H318 See Section 16 for the full text of the H statements declared above.	[1] [2]

Type

[1] Substance classified with a health or environmental hazard

[2] Substance with a workplace exposure limit

Occupational exposure limits, if available, are listed in Section 8.

SECTION 4: First aid measures

4.1 Description of first aid measures

Eye contact	: Electrode Conditioning Unit Dose Container	Immediately flush eyes with plenty of water, occasionally lifting the upper and lower eyelids. Check for and remove any contact lenses. Continue to rinse for at least 10 minutes. Get medical attention.
Inhalation	: Electrode Conditioning Unit Dose Container	Remove victim to fresh air and keep at rest in a position comfortable for breathing. If not breathing, if breathing is irregular or if respiratory arrest occurs, provide artificial respiration or oxygen by trained personnel. It may be dangerous to the person providing aid to give mouth-to-mouth resuscitation. Get medical attention if adverse health effects persist or are severe. If unconscious, place in recovery position and get medical attention immediately. Maintain an open airway. Loosen tight clothing such as a collar, tie, belt or waistband.
Skin contact	: Electrode Conditioning Unit Dose Container	Flush contaminated skin with plenty of water. Remove contaminated clothing and shoes. Continue to rinse for at least 10 minutes. Get medical attention. Wash clothing before reuse. Clean shoes thoroughly before reuse.
Ingestion	: Electrode Conditioning Unit Dose Container	Wash out mouth with water. Remove dentures if any. If material has been swallowed and the exposed person is conscious, give small quantities of water to drink. Stop if the exposed person feels sick as vomiting may be dangerous. Do not induce vomiting unless directed to do so by medical personnel. If vomiting occurs, the head should be kept low so that vomit does not enter the lungs. Get medical attention if adverse health effects persist or are severe. Never give anything by mouth to an unconscious person. If unconscious, place in recovery position and get medical attention immediately. Maintain an open airway. Loosen tight clothing such as a collar, tie, belt or waistband.
Protection of first-aiders	: Electrode Conditioning Unit Dose Container	No action shall be taken involving any personal risk or without suitable training. It may be dangerous to the person providing aid to give mouth-to-mouth resuscitation.

4.2 Most important symptoms and effects, both acute and delayed

Over-exposure signs/symptoms

Eye contact	: Electrode Conditioning Unit Dose Container	Adverse symptoms may include the following: pain or irritation watering redness
Inhalation	: Electrode Conditioning Unit Dose Container	No specific data.

Conditioner Solution Kit (5 pack)

SECTION 4: First aid measures

Skin contact	: Electrode Conditioning Unit Dose Container	Adverse symptoms may include the following: irritation redness
Ingestion	: Electrode Conditioning Unit Dose Container	No specific data.

4.3 Indication of any immediate medical attention and special treatment needed

Notes to physician	: Electrode Conditioning Unit Dose Container	Treat symptomatically. Contact poison treatment specialist immediately if large quantities have been ingested or inhaled.
Specific treatments	: Electrode Conditioning Unit Dose Container Electrode Conditioning Unit Dose Container	No specific treatment. Not available.

SECTION 5: Firefighting measures

5.1 Extinguishing media

Suitable extinguishing media	: Use an extinguishing agent suitable for the surrounding fire.
Unsuitable extinguishing media	: None known.

5.2 Special hazards arising from the substance or mixture

Hazards from the substance or mixture	: In a fire or if heated, a pressure increase will occur and the container may burst.
Hazardous combustion products	: No specific data.

5.3 Advice for firefighters

Special protective actions for fire-fighters	: Promptly isolate the scene by removing all persons from the vicinity of the incident if there is a fire. No action shall be taken involving any personal risk or without suitable training.
Special protective equipment for fire-fighters	: Fire-fighters should wear appropriate protective equipment and self-contained breathing apparatus (SCBA) with a full face-piece operated in positive pressure mode.

SECTION 6: Accidental release measures

6.1 Personal precautions, protective equipment and emergency procedures

For non-emergency personnel	: No action shall be taken involving any personal risk or without suitable training. Evacuate surrounding areas. Keep unnecessary and unprotected personnel from entering. Do not touch or walk through spilt material. Avoid breathing vapour or mist. Provide adequate ventilation. Wear appropriate respirator when ventilation is inadequate. Put on appropriate personal protective equipment.
For emergency responders	: If specialised clothing is required to deal with the spillage, take note of any information in Section 8 on suitable and unsuitable materials. See also the information in "For non-emergency personnel".

6.2 Environmental precautions

: Avoid dispersal of spilt material and runoff and contact with soil, waterways, drains and sewers. Inform the relevant authorities if the product has caused environmental pollution (sewers, waterways, soil or air).

6.3 Methods and material for containment and cleaning up

Conditioner Solution Kit (5 pack)

SECTION 6: Accidental release measures

- Small spill** : Stop leak if without risk. Move containers from spill area. Dilute with water and mop up if water-soluble. Alternatively, or if water-insoluble, absorb with an inert dry material and place in an appropriate waste disposal container. Dispose of via a licensed waste disposal contractor.
- Large spill** : Stop leak if without risk. Move containers from spill area. Approach the release from upwind. Prevent entry into sewers, water courses, basements or confined areas. Wash spillages into an effluent treatment plant or proceed as follows. Contain and collect spillage with non-combustible, absorbent material e.g. sand, earth, vermiculite or diatomaceous earth and place in container for disposal according to local regulations (see Section 13). Dispose of via a licensed waste disposal contractor. Contaminated absorbent material may pose the same hazard as the spilt product. Note: see Section 1 for emergency contact information and Section 13 for waste disposal.
- 6.4 Reference to other sections** : See Section 1 for emergency contact information.
See Section 8 for information on appropriate personal protective equipment.
See Section 13 for additional waste treatment information.

SECTION 7: Handling and storage

7.1 Precautions for safe handling

- Protective measures** : Put on appropriate personal protective equipment (see Section 8). Do not ingest. Avoid contact with eyes, skin and clothing. Avoid breathing vapour or mist. Keep in the original container or an approved alternative made from a compatible material, kept tightly closed when not in use. Empty containers retain product residue and can be hazardous. Do not reuse container.
- Advice on general occupational hygiene** : Eating, drinking and smoking should be prohibited in areas where this material is handled, stored and processed. Workers should wash hands and face before eating, drinking and smoking. Remove contaminated clothing and protective equipment before entering eating areas. See also Section 8 for additional information on hygiene measures.

7.2 Conditions for safe storage, including any incompatibilities

Store in accordance with local regulations. Store in original container protected from direct sunlight in a dry, cool and well-ventilated area, away from incompatible materials (see Section 10) and food and drink. Keep container tightly closed and sealed until ready for use. Containers that have been opened must be carefully resealed and kept upright to prevent leakage. Do not store in unlabelled containers. Use appropriate containment to avoid environmental contamination. See Section 10 for incompatible materials before handling or use.

7.3 Specific end use(s)

- Recommendations** : Not available.
- Industrial sector specific solutions** : Not available.

SECTION 8: Exposure controls/personal protection

8.1 Control parameters

Occupational exposure limits

Product/ingredient name	Exposure limit values
Electrode Conditioning Unit Dose Container ammonium bifluoride	EU OEL (Europe, 10/2019). [fluorides, inorganic] Notes: list of indicative occupational exposure limit values TWA: 2.5 mg/m ³ 8 hours.

- Recommended monitoring procedures** : If this product contains ingredients with exposure limits, personal, workplace atmosphere or biological monitoring may be required to determine the effectiveness of the ventilation or other control measures and/or the necessity to use respiratory protective equipment. Reference should be made to appropriate monitoring standards. Reference to national guidance documents for methods for the determination of hazardous substances will also be required.

SECTION 8: Exposure controls/personal protection

DNELs/DMELs

Product/ingredient name	Type	Exposure	Value	Population	Effects
Electrode Conditioning Unit Dose Container ammonium bifluoride	DNEL	Short term Oral	0.015 ng/kg bw/day	General population	Systemic
	DNEL	Long term Oral	0.015 mg/kg bw/day	General population	Systemic
	DNEL	Long term Inhalation	0.045 mg/m ³	General population	Systemic
	DNEL	Long term Inhalation	2.3 mg/m ³	Workers	Systemic
	DNEL	Short term Inhalation	3.8 mg/m ³	Workers	Local

PNECs

No PNECs available

8.2 Exposure controls

Appropriate engineering controls : Good general ventilation should be sufficient to control worker exposure to airborne contaminants.

Individual protection measures

Hygiene measures : Wash hands, forearms and face thoroughly after handling chemical products, before eating, smoking and using the lavatory and at the end of the working period. Appropriate techniques should be used to remove potentially contaminated clothing. Wash contaminated clothing before reusing. Ensure that eyewash stations and safety showers are close to the workstation location.

Eye/face protection : Safety eyewear complying with an approved standard should be used when a risk assessment indicates this is necessary to avoid exposure to liquid splashes, mists, gases or dusts. If contact is possible, the following protection should be worn, unless the assessment indicates a higher degree of protection: chemical splash goggles.

Skin protection

Hand protection : Chemical-resistant, impervious gloves complying with an approved standard should be worn at all times when handling chemical products if a risk assessment indicates this is necessary. Considering the parameters specified by the glove manufacturer, check during use that the gloves are still retaining their protective properties. It should be noted that the time to breakthrough for any glove material may be different for different glove manufacturers. In the case of mixtures, consisting of several substances, the protection time of the gloves cannot be accurately estimated.

Body protection : Personal protective equipment for the body should be selected based on the task being performed and the risks involved and should be approved by a specialist before handling this product.

Other skin protection : Appropriate footwear and any additional skin protection measures should be selected based on the task being performed and the risks involved and should be approved by a specialist before handling this product.

Respiratory protection : Based on the hazard and potential for exposure, select a respirator that meets the appropriate standard or certification. Respirators must be used according to a respiratory protection program to ensure proper fitting, training, and other important aspects of use.

Environmental exposure controls : Emissions from ventilation or work process equipment should be checked to ensure they comply with the requirements of environmental protection legislation. In some cases, fume scrubbers, filters or engineering modifications to the process equipment will be necessary to reduce emissions to acceptable levels.

SECTION 9: Physical and chemical properties

The conditions of measurement of all properties are at standard temperature and pressure unless otherwise indicated.

9.1 Information on basic physical and chemical properties

Appearance

Physical state	: Electrode Conditioning Unit Dose Container	Liquid.
Colour	: Electrode Conditioning Unit Dose Container	Colourless.
Odour	: Electrode Conditioning Unit Dose Container	Odourless.
Odour threshold	: Not relevant/applicable due to nature of the product.	
Melting point/freezing point	: Not relevant/applicable due to nature of the product.	
Softening point	: Not relevant/applicable due to nature of the product.	
Sublimation temperature	: Not relevant/applicable due to nature of the product.	
Initial boiling point and boiling range	: Electrode Conditioning Unit Dose Container	Not available.
Flammability (solid, gas)	: Electrode Conditioning Unit Dose Container	Not relevant/applicable due to nature of the product.
Upper/lower flammability or explosive limits	: Electrode Conditioning Unit Dose Container	Not available.
Flash point	: Electrode Conditioning Unit Dose Container	[Product does not sustain combustion.]
Decomposition temperature	: Not relevant/applicable due to nature of the product.	
pH	: Electrode Conditioning Unit Dose Container	Not applicable.
Viscosity	: Electrode Conditioning Unit Dose Container	Not available.
Solubility(ies)	: Not available.	
Solubility in water	: Not relevant/applicable due to nature of the product.	
Miscible with water	: Not relevant/applicable due to nature of the product.	
Partition coefficient: n-octanol/ water	: Not relevant/applicable due to nature of the product.	
Vapour pressure	:	

Ingredient name	Vapour Pressure at 20°C			Vapour pressure at 50°C		
	mm Hg	kPa	Method	mm Hg	kPa	Method
Electrode Conditioning Unit Dose Container water	23.8	3.2				

Evaporation rate	: Not relevant/applicable due to nature of the product.	
Relative density	: Electrode Conditioning Unit Dose Container	1
Density	: Electrode Conditioning Unit Dose Container	Not available.
Vapour density	: Electrode Conditioning Unit Dose Container	Not available.
Explosive properties	: Electrode Conditioning Unit Dose Container	Not available.
Oxidising properties	: Electrode Conditioning Unit Dose Container	Not available.

Particle characteristics

Median particle size : Not applicable.

Conditioner Solution Kit (5 pack)

SECTION 9: Physical and chemical properties

9.2 Other information

Fire point	: Electrode Conditioning Unit Dose Container	Not available.
Burning time	: Not relevant/applicable due to nature of the product.	
Fundamental burning velocity	: Not relevant/applicable due to nature of the product.	
Burning rate	: Not relevant/applicable due to nature of the product.	
SADT	: Not relevant/applicable due to nature of the product.	
SAPT	: Not relevant/applicable due to nature of the product.	
Heat of reaction	: Not relevant/applicable due to nature of the product.	
Heat of combustion	: Not relevant/applicable due to nature of the product.	
Flow time (ISO 2431)	: Not relevant/applicable due to nature of the product.	
Molecular weight	: Not relevant/applicable due to nature of the product.	

SECTION 10: Stability and reactivity

10.1 Reactivity	: No specific test data related to reactivity available for this product or its ingredients.
10.2 Chemical stability	: The product is stable.
10.3 Possibility of hazardous reactions	: Under normal conditions of storage and use, hazardous reactions will not occur.
10.4 Conditions to avoid	: No specific data.
10.5 Incompatible materials	: No specific data.
10.6 Hazardous decomposition products	: Under normal conditions of storage and use, hazardous decomposition products should not be produced.

SECTION 11: Toxicological information

11.1 Information on toxicological effects

Acute toxicity

Conclusion/Summary	: Electrode Conditioning Unit Dose Container	Not available.
---------------------------	--	----------------

Acute toxicity estimates

Product/ingredient name	Oral (mg/kg)	Dermal (mg/kg)	Inhalation (gases) (ppm)	Inhalation (vapours) (mg/l)	Inhalation (dusts and mists) (mg/l)
Electrode Conditioning Unit Dose Container Electrode Conditioning Unit Dose Container ammonium bifluoride	17687.3 100	N/A N/A	N/A N/A	N/A N/A	N/A N/A

Irritation/Corrosion

Conclusion/Summary

Skin	: Electrode Conditioning Unit Dose Container	Not available.
Eyes	: Electrode Conditioning Unit Dose Container	Not available.
Respiratory	: Electrode Conditioning Unit Dose Container	Not available.

Sensitisation

Conclusion/Summary

SECTION 11: Toxicological information

Skin : Electrode Conditioning Unit Dose Container Not available.

Respiratory : Electrode Conditioning Unit Dose Container Not available.

Mutagenicity

Conclusion/Summary : Electrode Conditioning Unit Dose Container Not available.

Carcinogenicity

Conclusion/Summary : Electrode Conditioning Unit Dose Container Not available.

Reproductive toxicity

Conclusion/Summary : Electrode Conditioning Unit Dose Container Not available.

Teratogenicity

Conclusion/Summary : Electrode Conditioning Unit Dose Container Not available.

Specific target organ toxicity (single exposure)

Not available.

Specific target organ toxicity (repeated exposure)

Not available.

Aspiration hazard

Not available.

Information on likely routes of exposure : Electrode Conditioning Unit Dose Container Not available.

Potential acute health effects

Eye contact : Electrode Conditioning Unit Dose Container Causes serious eye irritation.

Inhalation : Electrode Conditioning Unit Dose Container No known significant effects or critical hazards.

Skin contact : Electrode Conditioning Unit Dose Container Causes skin irritation.

Ingestion : Electrode Conditioning Unit Dose Container No known significant effects or critical hazards.

Symptoms related to the physical, chemical and toxicological characteristics

Eye contact : Electrode Conditioning Unit Dose Container Adverse symptoms may include the following:
pain or irritation
watering
redness

Inhalation : Electrode Conditioning Unit Dose Container No specific data.

Skin contact : Electrode Conditioning Unit Dose Container Adverse symptoms may include the following:
irritation
redness

Ingestion : Electrode Conditioning Unit Dose Container No specific data.

Delayed and immediate effects as well as chronic effects from short and long-term exposure

Short term exposure

SECTION 11: Toxicological information

Potential immediate effects	: Electrode Conditioning Unit Dose Container	Not available.
Potential delayed effects	: Electrode Conditioning Unit Dose Container	Not available.
<u>Long term exposure</u>		
Potential immediate effects	: Electrode Conditioning Unit Dose Container	Not available.
Potential delayed effects	: Electrode Conditioning Unit Dose Container	Not available.
<u>Potential chronic health effects</u>		
Not available.		
Conclusion/Summary	: Electrode Conditioning Unit Dose Container	Not available.
General	: Electrode Conditioning Unit Dose Container	No known significant effects or critical hazards.
Carcinogenicity	: Electrode Conditioning Unit Dose Container	No known significant effects or critical hazards.
Mutagenicity	: Electrode Conditioning Unit Dose Container	No known significant effects or critical hazards.
Reproductive toxicity	: Electrode Conditioning Unit Dose Container	No known significant effects or critical hazards.
Interactive effects	: Electrode Conditioning Unit Dose Container	Not available.
<u>Toxicokinetics</u>		
Absorption	: Electrode Conditioning Unit Dose Container	Not available.
Distribution	: Electrode Conditioning Unit Dose Container	Not available.
Metabolism	: Electrode Conditioning Unit Dose Container	Not available.
Elimination	: Electrode Conditioning Unit Dose Container	Not available.
Other information	: Electrode Conditioning Unit Dose Container	Not available.

SECTION 12: Ecological information

12.1 Toxicity

Conclusion/Summary : Electrode Conditioning Unit Dose Container Not available.

12.2 Persistence and degradability

Conclusion/Summary : Electrode Conditioning Unit Dose Container Not available.

12.3 Bioaccumulative potential

Not available.

12.4 Mobility in soil

Soil/water partition coefficient (K_{oc}) : Electrode Conditioning Unit Dose Container Not available.

Mobility : Electrode Conditioning Unit Dose Container Not available.

Conditioner Solution Kit (5 pack)

SECTION 12: Ecological information

12.5 Results of PBT and vPvB assessment

This mixture does not contain any substances that are assessed to be a PBT or a vPvB.

12.6 Other adverse effects : No known significant effects or critical hazards.

SECTION 13: Disposal considerations

13.1 Waste treatment methods

Product

Methods of disposal : The generation of waste should be avoided or minimised wherever possible. Disposal of this product, solutions and any by-products should at all times comply with the requirements of environmental protection and waste disposal legislation and any regional local authority requirements. Dispose of surplus and non-recyclable products via a licensed waste disposal contractor. Waste should not be disposed of untreated to the sewer unless fully compliant with the requirements of all authorities with jurisdiction.

Hazardous waste : The classification of the product may meet the criteria for a hazardous waste.

Packaging

Methods of disposal : The generation of waste should be avoided or minimised wherever possible. Waste packaging should be recycled. Incineration or landfill should only be considered when recycling is not feasible.

Special precautions : This material and its container must be disposed of in a safe way. Care should be taken when handling emptied containers that have not been cleaned or rinsed out. Empty containers or liners may retain some product residues. Avoid dispersal of spilt material and runoff and contact with soil, waterways, drains and sewers.

SECTION 14: Transport information

ADR/RID

14.1 UN number Electrode Conditioning Unit Dose Container Not regulated.

14.2 UN proper shipping name Electrode Conditioning Unit Dose Container -

14.3 Transport hazard class(es) Electrode Conditioning Unit Dose Container -

14.4 Packing group Electrode Conditioning Unit Dose Container -

14.5 Environmental hazards Electrode Conditioning Unit Dose Container No.

Additional information Electrode Conditioning Unit Dose Container -

14.4 Packing group	Electrode Conditioning Unit Dose Container	-
14.5 Environmental hazards	Electrode Conditioning Unit Dose Container	No.
Additional information	Electrode Conditioning Unit Dose Container	-

14.6 Special precautions for user : Electrode Conditioning Unit Dose Container

Transport within user's premises:
always transport in closed containers that are upright and secure. Ensure that persons transporting the product know what to do in the event of an accident or spillage.

14.7 Transport in bulk according to IMO instruments : Not applicable.

SECTION 15: Regulatory information

15.1 Safety, health and environmental regulations/legislation specific for the substance or mixture

UK (GB) /REACH

Annex XIV - List of substances subject to authorisation

Annex XIV

None of the components are listed.

Substances of very high concern

None of the components are listed.

Ozone depleting substances

Not listed.

Prior Informed Consent (PIC)

Not listed.

Persistent Organic Pollutants

Not listed.

Annex XVII - Restrictions on the manufacture, placing on the market and use of certain dangerous substances, mixtures and articles : Electrode Conditioning Unit Dose Container Not applicable.

Seveso Directive

This product is not controlled under the Seveso Directive.

EU regulations

Industrial emissions (integrated pollution prevention and control) - Air : Electrode Conditioning Unit Dose Container Not listed

Industrial emissions (integrated pollution prevention and control) - Water : Electrode Conditioning Unit Dose Container Not listed

International regulations

Montreal Protocol

Not listed.

Stockholm Convention on Persistent Organic Pollutants

Not listed.

Rotterdam Convention on Prior Informed Consent (PIC)

Not listed.

UNECE Aarhus Protocol on POPs and Heavy Metals

Not listed.

15.2 Chemical safety assessment : Not applicable.
